

Herbidome350

A shielded CDA sprayer for general and band weed control

Herbidome 350 is a shielded CDA sprayer suitable for a wide range of weed control applications from fruit, orchards and vineyards to amenity and forestry.

- Efficient weed control offering significant labour savings
- Up to three times as fast as a knapsack sprayer
- Fully shielded to minimise spray drift
- Suitable for use in windy weather conditions
- Increased work rate due to low volume application
- Lightweight and easy to use

Fast and effective weed control

Incorporating a shielded design and innovative CDA (Controlled Droplet Application) technology, Herbidome 350 has been developed for use in a wide range of weed control situations.

Thanks to Micron's pioneering CDA technology, Herbidome 350 delivers excellent performance and operational efficiencies. The rotary CDA atomiser is fitted under Herbidome 350's freely rotating flexible shroud. Combined, these features offer a smooth and targeted weed control operation, as well as significant labour cost savings and reduction in application volumes.

Herbidome 350 is supplied with a comfortable carrying strap.

A highly versatile solution

Highly versatile, Herbidome 350 is suitable for controlling weeds in most situations which include:

- Soft fruit
- Orchards
- Vineyards
- Amenity and highways
- Forestry
- Row crops
- Sensitive areas such as waterways and marshland
